

TECHNICAL DATA SHEET

POLYGARD ARCTIC -20°C SCREENWASH

DESCRIPTION

POLYGARD ARCTIC SCREENWASH is a highly concentrated glass cleaner that helps keep windscreens free of road debris, grease, insect remains and ice under both winter and summer driving conditions thereby improving visibility and safety. When used neat it will help de-ice your windscreen and prevent refreezing down to minus 20° C. Under less severe winter conditions it may be diluted in accordance with the table below to afford the level of protection required.

TYPICAL PROPERTIES

PARAMETER	TYPICAL FIGURE
APPEARANCE	CLEAR BLUE LIQUID
S.G. @ 20°C	0.965
pH	6.5 to 9.0
FREEZE PROTECTION	Minus 20° C

APPLICATION

DILUTION for WINTER USE	FREEZING PROTECTION
UNDILUTED	- 20 deg C
1:1 SCREENWASH : WATER	- 10 deg C
1:5 SCREENWASH : WATER	- 5 deg C

For summer use, dilutions from 1:9 to 1:15 screenwash: water will effectively remove traffic film, grease and insect debris to keep your windscreen clear and reduce smearing that can lead to reduced visibility.
