

JAMES HARVEST

Since 1988, James Harvest has been helping businesses across the globe create a unified and inspired team image. With our roots in collegiate fashion and a passion for high-quality materials, our extensive range of stylish corporate apparel now spans 26 countries.

We focus on blending function with fashion, making sure your team looks as professional as they feel. Our dedication to quality has earned the trust of countless companies that choose us for their corporate and promotional wear, knowing that a strong identity starts with how you present yourself.

COORDINATED STYLES WITH OUR SIGNATURE FAMILIES

Our Signature Families—carefully curated collections of garments designed to complement each other in both color and style. Each family features a harmonious blend of shades, ensuring that every piece works seamlessly together. Crafted from high-quality materials, these garments are perfect for building a versatile, timeless wardrobe.

RESPONSIBILITY & SUSTAINABILITY

CLIMATE IMPACT AND EMISSIONS

Research shows that 80 % of the climate impact from Swedish clothing comes from the production phase*. By doubling the active lifespan of a garment, the climate impact can be almost halved. Thus, the most important thing we can do is to increase the longevity of the products. That is why classic design and quality products - a concept that will never be out-of fashion - is the very core of everything we do. In addition, work actively with our suppliers regarding energy efficiency, energy source and production techniques to further reduce our total impact. A significant share of a garment's total environmental footprint is traceable to the choice of material. Therefore, we strive to use more preferred materials - such as recycled polyester and organic cotton - whenever possible. However, all materials have advantages and disadvantages from a sustainability perspective and priority is always quality and durability to enable a long lifecycle.

For transportation, that also significantly contributes to greenhouse gas emissions, we have to main strategies. Firstly, we constantly work with evaluating our processes to streamline our routines and plan our purchases well in advance. Within the New Wave Group, shipments of different sister companies are clubbed together as much as possible so that containers are always optimally filled during transport. We are also very careful which partners we choose to work with and only use well-known carriers we know are at the forefront from a sustainability perspective, both for sea freight and land transport. Secondly, we strive to influence the transportation companies that we are working with. New Wave Group is a member of "Clean Shipping Index", that aims to impact the shipping companies to use cleaner vessels by ranking the most high-performing ships.

PROGRESSIVE WORK WITH CHEMICALS

All suppliers must follow the requirements in our Restricted Substance List. The list has been designed in accordance with legislation such as REACH, but also taking industry recommendations and standards such as Oeko Tex into account. Through our parent company New Wave Group, we take part of the Swedish Chemicals Group organized by RISE to receive the most updated information on chemical legislation and developments. With this information we can actively work to reduce and replace chemicals in line with best available techniques.

IMPROVING WORKING CONDITIONS

We are aware of the great responsibility that comes with sourcing goods in countries which have not come as far as us when it comes to working conditions and environmental issues. We must ensure that the business operations of our suppliers respect national requirements as well as international conventions on human rights. Successful work requires devotion and patience. Many of the challenges we face are global problems like poverty and malfunctioning welfare systems. In this sense, social compliance does not offer a quick fix. We believe it is essential to be presented on-site. For this reason, we have local offices in Asia taking care of the everyday work with supplier auditing, monitoring and dialogue. Our full-time CSR staff are educated and well-experienced on labor conditions and environmental aspects of the production sites. Their work is leading the development.

CODE OF CONDUCT – AMFORI BSCI

Our Code of Conduct summarizes what we expect from all our suppliers when it comes to social and environmental responsibility. It contains requirements such as minimum wage, working hours, prohibition of child labor and several other requirements from global frameworks such as the ILO Conventions and the UN Declaration of Human Rights. Through New Wave Group we are a member of amfori BSCI (Business Social Compliance Initiative) and have adopted the amfori BSCI Code of Conduct. Today, more than 2000 companies all over the world have joined amfori BSCI and have adopted the code. Together we reach out to approximately 30 000 unique suppliers worldwide, which empowers our voice and influence in social dialogue. In addition to internal audits and supplier visits, we are obliged to implement and follow up the Code of Conduct through third-party audits. Amfori BSCI is a commitment, and the most important work begins when the inspection is completed, and the findings are to be remedied. Therefore, it is not permitted to use amfori BSCI as a label or a guarantee for individual products. The amfori BSCI logo may only be used to prove membership so that the customer can feel confident that we take long-term responsibility - even for suppliers who need to improve.

INTERNATIONAL ACCORD

New Wave Group has signed the International Accord for Health and Safety in the Textile and Garment Industry. The original Accord – or the Accord on Fire and Building Safety in Bangladesh – came into force in 2013, only weeks after the Rana Plaza disaster where a factory building collapsed. New Wave Group signed the agreement, which was a legally binding agreement for improved safety in the textile industry in Bangladesh with focus on structural, electrical and fire safety. The agreement meant, among other things, that factories undergo electrical and building inspections as well as training and education in fire safety. Now the original Accord has developed into the International Accord, which New Wave Group has also signed. In addition to fire and building safety, the International Accord also covers general work environment, and the ambition is to expand the program to other production countries, hence the name change. The Accord is a unique initiative that has a significant impact on the daily life of millions of textile workers. We are proud to be a part of this initiative.

RECYCLING FOR A SUSTAINABLE SOCIETY

To collect and recycle waste packages is a wonderful way to reduce environmental impact and create cradle-to-cradle circulation. We embrace the national collecting system where we operate. In Sweden, we are affiliated with FTI (Förpackningsinsamlingen) and comply with Producer Responsibility obligations.

PREPARING FOR UPCOMING LEGISLATIONS

Driven by the European Green Deal, we are facing many new laws and regulations related to sustainability the coming years. For example, the Corporate Sustainability Reporting Directive (CSRD), and the Ecodesign for Sustainable Products Regulation (ESPR). All place higher demands on traceability and transparency and will have a great impact on our operations in the future. Therefore, we put a lot of focus on working our processes and introducing support systems to be able to manage increased demands on information and transparency.

A woman with blonde hair tied back, wearing a navy blue quilted bomber jacket over a black textured knit top and black trousers. She is standing outdoors with a blurred background of trees and a blue circular sign. The text 'THE CAPSULE COLLECTION' is overlaid at the bottom in white serif font.

THE CAPSULE
COLLECTION

A capsule collection is a limited set of versatile, timeless clothing designed to complement each other. Originating in the 1970s, it promotes minimalism and practicality by allowing various outfit combinations. Focusing on classic styles rather than trends, this approach encourages sustainability by prioritizing fewer, higher-quality garments. Our collection uses organic cotton and recycled materials to offer stylish, cohesive pieces that simplify your wardrobe while supporting sustainability.

Harvest Outdoor. Where quality meets sustainability in the world of outdoor apparel. We believe that your adventures should be accompanied by outerwear that not only provides top-notch performance but also reflects your commitment to the environment. That's why we're proud to introduce our innovative jacket concept, designed to elevate your outdoor experiences while minimizing our impact on the planet.

Our jackets feature Oeko-Tex certification, ensuring that they meet stringent consumer safety standards. Additionally, we prioritize the use of recycled polyester in our products, reducing waste and minimizing our carbon footprint.

Our collection of high-quality jackets and fleeces is meticulously crafted to meet the demands of outdoor enthusiasts like you. Whether you're braving the elements on a mountain hike, exploring rugged trails, or simply enjoying a brisk stroll through nature, our jackets are engineered to keep you comfortable, dry, and stylish every step of the way.

PINNACLES

♂ 2131046 S-4XL

♀ 2121057 XS-XXL

Pinnacles, a 3 in 1 multifunctional outerwear jacket designed for maximum protection and comfort in wet conditions. The outer jacket is made out of recycled polyester, features taped seams and waterproof zippers to ensure complete water resistance. The jacket includes two zipped side pockets and a zipped chest pocket for secure storage. Both the sleeves and the hem are adjustable, with velcro on the sleeves and an elastic drawcord on the hem, allowing for a customizable fit. The hood is both adjustable and detachable, offering versatility, and the chin protector enhances comfort by preventing chafing.

The inner jacket is a padded jacket made out of certified recycled polyamide and provides additional warmth. It also features two zipped side pockets for secure storage and includes a chin protector for extra comfort. This combination of an outer functional rain jacket and a padded inner jacket makes for a versatile and protective layering system, ideal for various weather conditions.
